***Examination of Application #09/707,486***

1. Claims 1-40 of application 09/707,486, filed on 7-November-2000, are presented for examination.

***Claim Rejections under 35 U.S.C. § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

- 2.1 Method claims 16-24 are rejected for reciting a process that is not directed to the technological arts, specifically in regard to claim 16, a method for storing and sensing the temperature of an integrated circuit, and decreasing the clock frequency of the integrated circuit. To be statutory, the utility of an invention must be within the technological arts. *In re Musgrave*, 167 USPQ 280, 289-90 (CCPA, 1970). The definition of "technology" is the "application of science and engineering to the development of machines and procedures in order to enhance or improve human conditions, or at least to improve human efficiency in some respect." (Computer Dictionary 384 (Microsoft Press, 2d ed.1994)). The limitations recited in claim 16 contain no language suggesting that these claims are intended to be within the technological arts. However, please note that the method steps of claim 16 recited as part of a "computer-implemented method" would be considered as directed to the technological arts.

In re Application of: Pippin

***Allowed Claims***

3. Claims 1-15 and 25-40 are deemed allowable over the prior art of record at this time.

Accordingly, claims 16-24 are also deemed allowable over the prior art of record at this time, and would be allowable upon resolution of the 101 rejection noted above.

***Response Guidelines***
